Note:

People with delegated responsibilities for Health and Safety issues should ensure that the required risk assessments and safety records are completed, either by them or by others and that the required control measures are implemented when work activities take place.

Where more than one person has been assigned responsibility to a particular subject, each should ensure that they have fulfilled their responsibilities in the areas under their control and completed the relevant records. Together they need to check that collectively the organisation has covered all aspects of safety management for the subject.
